Boom Elevation

Single lift cylinder with safety valve provides boom angle from -3° to +83°.

Lattice Jib Extension

Two 26 ft. (8 m) inserts for use with lattice swingaway extension to increase length up to 85 ft. (26 m) or 112 ft. (34 m).

Hydraulic Offsettable Lattice Swingaway

36 ft. - 59 ft. (11 m - 18 m) hydraulic offsettable lattice swingaway extension. Hydraulically offsettable 5°-40° with hydraulic luffing.

*Optional Lattice Extension

36 ft. - 59 ft. (11 m - 18 m) lattice swingaway extension offsettable at 0°, 20° and 40°.

Load Moment & Anti-Two Block System

Load moment and anti-two block system with audio/visual warning and control lever lockout provides electronic display of boom angle, length, radius, tip height, relative load moment, maximum permissible load, load indication and warning of impending two-block condition.

Cab

All aluminum construction cab is hydraulically tiltable (approximately 20°) and includes safety glass and adjustable operator's seat with hydraulic suspension. Other features include engine dependent hot water heater, armrest integrated crane controls, and ergonomically arranged instrumentation.

Swing

2 swing gears with axial piston fixed displacement motors provide swing speed of 0 - 1.7 RPM thru planetary gear box. Holding brake and service brake.

Counterweight

68,300 lbs. (31,000 kg) consisting of various sections with hydraulic installation/removal system.

Engine

Mercedes-Benz OM904LA, diesel, 4 cylinders, water cooled, turbocharged, 168 HP (125 kW) at 2300 rpm. Max. torque: 487 ft./lbs. (660 Nm) at 1200 rpm. Engine emission: EURO II/EUROMOT/EPA/CARB (non road).

Fuel Tank Capacity

53 gal. (200 L).

Hydraulic system

2 separate circuits, 1 axial piston variable displacement pump (load sensing) with electronic power limiting control and 1 gear pump for swing. Standard thermostatically controlled oil cooler keeps oil at optimum operating temperature. Tank capacity: 222 gal. (840 L)

Control system

Full electronic control of all crane movements is accomplished using electrical control levers with automatic reset to zero. Controls are integrated with the LMI and engine management system by CAN-BUS.

Hoist

Main and auxiliary hoist are powered by axial piston motor with planetary gear and brake. "Thumb-thumper" hoist drum rotation indicator alerts operator of hoist movement.

WARNING: THIS CHART IS ONLY A GUIDE.
 The notes below are for illustration only and should not be relied upon to operate the crane. The individual crane's load chart, operating instructions and other instruction plates must be read and understood prior to operating the crane.

1. All rated loads meet ANSI/ASME B30.5, Mobile and Locomotive Cranes. Testing and development were performed to SAEJ1063, Cantilevered Boom Crane Structures - Method of Test and SAEJ765 Crane Stability Test Code.

2. Capacities given do not include the weight of hook blocks, slings, auxiliary lifting equipment and load handling devices. Their weights must be added to the load to be lifted. When more than minimum required reeving is used, the additional rope weight shall be considered part of the load.

3. The machine shall be leveled on a firm supporting surface. Depending on the nature of the supporting surface, it may be necessary to have structural supports under the outrigger floats to spread the load to a larger bearing surface.

4. When either boom length or radius or both are between values listed, the smallest load shown at either the next larger radius or next longer or shorter boom length shall be used.

5. For outrigger operation, outriggers shall be properly extended with tires raised off the ground before operating the boom or lifting loads.

GMK5120B Features and Benefits

▶ MEGATRAK™ is an independent suspension and all wheel steer system which allows all wheels to remain on the ground at all times so stresses and weight are not continually transferred between axles

▶ ECOS (Electronic Crane Operating System) is a computerized system that continuously monitors and controls principle crane functions as programmed by an operator

▶ EKS4 is an electronic load moment indicator that operates in conjunction with ECOS continuously displaying crane configuration and load moment data

▶ MEGAFORM™ is a "U" shape boom design which forms a natural cradle position for boom sections which eliminates stiffeners thus reducing weight and increasing capacity

▶ TWIN-LOCK™ is a boom pinning mechanism that automatically pins the sections in position using two horizontal large diameter boom pins
